Project 10

LGS / CFS BUILDINGS

Offering all-round advantages, the LGS / CFS building is not only lighter but also more appealing in terms of quality, cost and durability of the structure. Bespoke design, offsite construction and fast-track installation have contributed to its growth & acceptance worldwide.

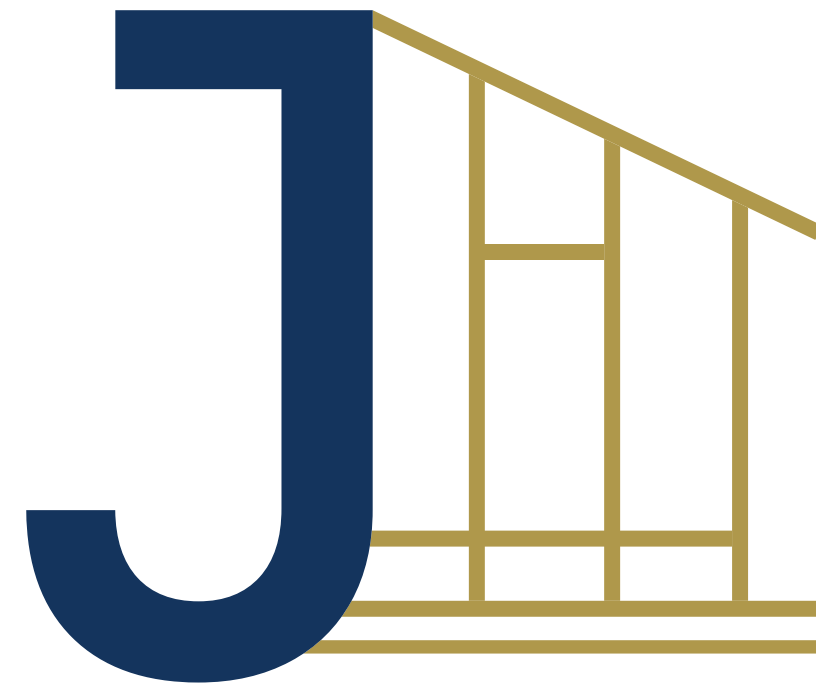

Project 11

Prefabricated Building

Designed for a vast array of onshore and offshore applications, our modular systems are designed and fabricated in UAE. Fully certified for worldwide use and built to the highest standards we utilize many key components that are fabricated in-house
